

Voicemed is pleased you have visited our website.

We believe our experience, technology, and key business partners make us an excellent choice to complement your patient communications strategies. By offering highly leverageable value-added technology on an “on- demand” basis, we are able to manage your telephone interactions through a single platform, seamlessly integrated with your legacy applications, with minimal IT intervention from your team.

This results in the ability to reach more patients in a low cost, high touch mode that produces greater ROI. Our service is significantly less expensive than more traditional means of patient contact.

We are aware that “net return” in cash and account resolution through appropriate diligence is always the most important measurement of our success. However, in addition to financial results, we understand the importance of public relations and government compliance (including HIPAA) as an additional measure of success. Our programs are always within the guidelines of federal, state and local laws, as well as the service expectations of our clients.

In addition to the above, we believe true success lies in customizing our programs to the needs of each individual client. We will accomplish this for you through planning and implementation meetings, thorough ongoing communication and process improvement thinking.

If you have any questions or need additional information, please don't hesitate to contact me at 918-299-4848.

Best regards,

Pete Thibeault
